■ **Note:**

- (1) The inverter can operate with a power factor of $\cos\phi \geq 0,98$ lead or lag. The inverter is not able to operate with adjustable power factor.
- (2) Voltage protection is set in accordance with the limits and trip times listed in Table 2, chapter 5.2.1, considering a nominal voltage of 220V/1-phase and 380V/3-phase respectively. Frequency trip limits and trip times are in accordance with the values specified in chapter 5.2.2.
- (3) Reactive power capability in accordance with the requirements listed in chapter 4.7.3. Qmax (maximum inductive/capacitive reactive power) is 43,6% of rated active power (see Fig.2).
